# Sideline exhibition

The November run of MINERALS BRNO featured a sideline exhibition of carbonates. The upper concourse of Hall B showcased panels and exotic samples, as well as minerals inherent to common ore deposits, covering a total of 160 square metres. The majority of the samples on display originated from Czechia and Slovakia.

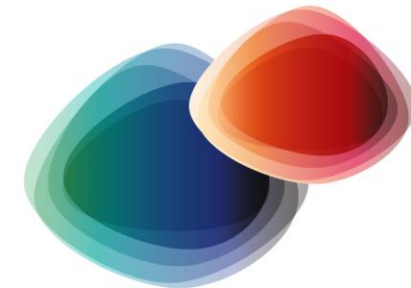

# Sales met expectations

The latter part of November is characterised by the approaching Christmas season. The spirit of Christmas also pervaded the MINERALS BRNO 2023 trade fair held in November. Despite the challenging economic situation in the Czech Republic, exhibitors achieved satisfactory sales, and visitors found inspiration not only for gifting their loved ones but also for themselves.

A photo corner with a large amethyst geode was available for all visitors; it was continuously occupied by people interested in an unusual shot they could use on socials. We would like to express our gratitude to Mr. Szweda from MINERAL-ART for lending it to us.

See you again on 25 – 26 May 2024
