Conference

The main part of URBIS was a **three-day conference**. Topics included mobility, smart solutions for municipalities and cities, and current issues such as the energy crisis. Wednesday's programme in the FUTURE MOBILITY block included the conference **Current Trends and Challenges in Urban Smart Mobility**, organised by the Association for Transport Telematics. The conference programme featured more than **10 workshops**.

The Fair

Both in Hall A1 and in the outdoor areas in Demo City, exhibitors presented smart solutions for the municipal sector and transport. **Autonomous minibus, last mile delivery robot, electric vehicles for passenger and freight transport, and vehicles for the municipal sector** were presented. Other exhibitors offered digital solutions or components for **municipal and transport infrastructure**.

Urban Mobility Days

URBIS SMART CITY FAIR 2022 was integrated into the European Mobility Week, which ran from 16 to 22 September. The URBIS conference URBAN MOBILITY DAYS was therefore held concurrently with the fair at the Brno Exhibition Centre. The location of this conference in Brno was related to the Czech Presidency of the Council of the European Union.

Demo City

In the Demo City, visitors found, among other things, **cargo bikes and micro-mobility equipment** to try out. Electric cars and electric motorcycles were also available for visitors to test. A **functional intersection controlled by a smart traffic system** was installed in the Demo City, where it was possible to monitor the preferential passage of vehicles.

Clean Mobility Day

The last day of URBIS 2022 fell on the **European Car Free Day**. The organisers joined it with the **Clean Mobility Day**, when the exhibition centre was opened to visitors free of charge. The purpose of this arrangement was to educate in a fun way and **motivate the use of alternative and clean means of transport**. In addition, Demo City also featured a bike polo field on this day and bike races were organised, including cargo bike races.
